TUTZI COAT STAND

was designed by our Italian chef designer Eugenio Gargioni and received the Red Dot Design Award. By an innovative module of six joined triangular sections, Tutzi creates the hexagonal section of the stick that is with three parts: the vertical stick and two slanting elements that are the hook and the base. It allows using different kind of wood, different finishing which is suitable for any purposes.

HAND MADE NEW CLASSICS

A philosophy which, in collaboration with the Jean Louis Iratzoki design studio, builds a closer link with what is home-made and strengthens respect for a job well done. Products based on eco-design, made with natural fibres and fine woods... In short, work with a common goal: respect for people, which has been present ever since the earliest days of a company that as established its business model as a Cooperative, making all its workers not only shareholders, but also partners in the approach, history and successes of ALKI, reclaiming a story full of meaning, transferring the hallmarks of tradition to modern-day living.

ALKI / 法國首席設計師 JEAN LOUIS IRATZOKI

法國傢俱工業的發展協會(CODIFA)於1979年創立VIA Labels Award。VIA志於在室內傢俱的領域(傢俱、燈具、桌子藝術、裝飾用品、地毯、室內傢俱的紡織品...等)促進並且提高現代傢俱創作的身價。VIA所有活動的計畫：社會展望學的思考，創作上的支持，策略上的原則，發行、推銷與情報的影響，都是為了法國室內傢俱在法國及世界發展的目標。他們向所有的傢俱同業請教：工業團體、中小企業、手工業者、發行者及創作者。

DELTA這個獎項是西班牙的設計協會ADI-FAD所舉辦的設計獎項，也是歐洲著名的工業設計評獎活動之一。近幾年開始頒發給工業領域內的最佳設計，並且每兩年改選一次。該獎項的設立激發了設計公司和設計師進行創新的積極性，有利於企業設計管理水平的提高，同時致力於通過對獲獎者的宣傳，引導整個社會對優秀設計的認同，營造有利於創意產業發展的社會環境。西班牙的工業設計之所以能夠在世界上保持領先的水平，與政府重視專業評獎活動是分不開的。

In the factory, at every workstation, the men and women use specific skills and know-how. Many different trades are concerned in the manufacturing procedure: carpenters, cabinet-makers, sculptors, assemblers, varnishers and also upholsterers.

But before this, CAD(computer-aided design) and CAM (computer-aided manufacturing) technicians made a 3D interpretation of the designer's models. When the doors open, a very strong smell of wood overcomes you.

The raw material used is mainly oak wood, provided respecting sustainable forest management and allowing the preservation of natural resources. The wood is first stocked before going through a drying procedure enabling to obtain a 10-12% humidity rate.

High technology is associated to man expertise. All complex pieces are machined in order to ensure accurate assembly. The pieces are afterwards hand sanded and stained. On another side the upholsterer's team is at work. Wool, felt and leather are sewed here. The META chair or the LAIA seat pads are examples of feats in this art. This is how the ALKI models come in to being, offering pure lines, a real comfort and a guarantee of authenticity.

Maturity only comes when we understand that what we have comes from a long journey of constant work and awareness. Experiences that we ever more demanding when it comes to choosing something that is to become part of our surroundings.

If the seven million people who inhabit the world were to consume the same as the developed Western countries, then we would need ten planets like ours to satisfy all our needs... UWOOD is committed to ecological manufacture in all its elements And so simplicity and beauty can come together with love of nature.

The values that permeate the very fabric of our surroundings have a constant and often unconscious influence on our way of dealing with life. This is possibly why UWOOD could not shake off sensations that are so inherent to the earth, combining awareness of tradition with the expertise of constant research.

Danish Design is a term often used to describe a style of functionalistic design and architecture that was developed in mid-20th century. Influenced by the German Bauhaus school, many Danish designers used the new industrial technologies, combined with ideas of simplicity and functionalism to design buildings, furniture and household objects, many of which have become iconic and are still in use and production.

The passing of the years and the delight in unique articles fill UWOOD DENMARK SERIES with an ancestral skill that brings together tradition and technology. The result: a collection of items of great aesthetic quality which evoke within us our inner selves, our experiences, textures and aromas which return us to a natural setting in which we can breathe the spirit of authenticity...

The construction of the Maison de la Solidarite d'Ortez is a unique and innovative project of 1000m2 designed by the Gauche's Muru group of architects. The specificity of this bio-climatic building is based on the firm belief of the architects that no one can ignore the environment and architecture must be an example. It is in this optic

that UWOOD was chosen to furnish the building. In natural mandy and harmonious colours the collections denmark series combine perfectly in this environment.

Denmark's late industrialisation combined with a tradition of high-quality craftsmanship formed the basis of gradual progress towards industrial production. After the end of the war, Europeans were keen to find novel approaches such as the light wood furniture from Denmark.

Just a few meters away from the Champs Elysees, Hotel Marceau offers a décor which associates the codes of both Haussmann and design. The formal breakfast room has nonetheless a cosy atmosphere and Denmark chairs in natural mandy and leather give the tone to the pristine tables with their white cloths. Similarly in the bedrooms coffee chairs combine with small table to give an relax space.

Most of the time we are not aware of what truly stimulates our spirit; it is intangible. Simplism is a nod to memory, an interpretation of the reminiscences that once made us happy and that, having given them form, remain there forever, without fear of neglect or the passage of time...

The Denmark coffee chair or tree coat stand are examples of feats in this art. This is how the UWOOD models come in to being, offering pure lines, a real comfort and a guarantee of authenticity.

It's always interesting when we see little pieces of nature incorporated in the artificially created furniture pieces. Some designers are trying to imitate some of nature's elements creating something like a bookcase shaped like a tree or a coffee table. But others go a little further and take that sensation of authenticity to another level.

To make it so natural and raw Uwood has come up with some splendid furniture that features unprocessed planks of high quality wood from selected trees to give it a natural look.
